Stride iOS App Development Agreement

Founder: Sam Pencer
CTO: Tadi Rogella
Total Compensation: $8,000 + 10% dilutable until equity is equal to 3%. At this point equity becomes non-dilutable (dilutable proportional to total shares diluted) (Milestone-Based)

Phases may be completed in parallel or out of order if the developer deems it will increase efficiency.

Phase 1 – Authentication and User Management (Expected work time: 2-3 weeks total)

Deliverables:

- Build secure authentication system for **both iOS mobile and web platforms** (email + password).
- Create **user account management interfaces** for clients, providers, and organizational managers.
- Implement **provider dashboard** (mobile + web) with resident list, basic info, and quick access to assigned clients.
- Develop **organization data structure** that allows multiple providers, layered roles (PSWs, lifestyle staff, managers), and support for large organizations with hundreds of residents.
- Set up **client–provider relationship management**, including the ability for managers to assign/remove residents to specific staff.

Outcome:
By the end of this phase, both clients and providers can create/manage accounts on a simple UI. Retirement homes and homecare organizations can structure accounts across multiple staff, assign residents, and view resident details.

Important questions to resolve:

- How should **large organizations** with hundreds of residents and multiple staff be structured?

- Should **organization-level analytics** be included at this phase, or deferred to Phase 2?
- Can one resident be assigned to **multiple providers** (e.g., PSW + lifestyle staff)?

Compensation: $1750, 1% equity

Phase 2 – Exercise Creation & Staff Workflow Logic (Expected work time: 2-3 weeks total)

Deliverables:

- Build backend logic to **generate personalized exercises** (physical + cognitive) using AI and automation.
- Create **provider approval workflow** that allows staff to modify exercises in real time if deemed inappropriate.
- Add **staff-facing "live session" mode** on mobile where PSWs/lifestyle workers can do workouts alongside residents, with quick controls to substitute or skip exercises.
- Build ability for providers to **update platform weekly** with completed exercises, attendance, and engagement notes.
- Integrate **GIF/video support** for exercise demonstration.
- Develop **web-app client interface**: formatted list of exercises, mark-as-complete functionality, and administrative tools for providers.
- Implement **manager-level dashboard** in web-app: high-level view of resident engagement, drilldown into individual users, and staff-level performance tracking.

Business Tasks:

- Provide **exercise content sources, GIF libraries, or video clips**.
- Test exercise generation quality and provide iterative feedback.
- Define the **client intake process** (questionnaires, mobility level quiz, preferences).

Outcome:
By the end of this phase, Stride will have automated exercise generation with built-in staff oversight, client-facing formatted lists, and dashboards for providers/managers. Both mobile and web platforms will support live use, weekly updates, and printable exercise routines.

Compensation: $2,500, 3% equity

Phase 3 – UI/UX Polish and Launch Prep (Expected work time: 1-2 weeks total)

Deliverables:

- Major **UI/UX improvements and polish** across iOS and web dashboards for ease-of-use by seniors and staff.
- Create **print view** for generating physical copies of workout plans tailored to residents and possible email utilization
- Enhance **manager dashboard analytics** (weekly reports, resident activity summaries, staff productivity metrics).
- Submit **iOS app to App Store** for review.
- Perform **bug fixes, optimization, and stress testing** across large user datasets (simulate 500–1,000 residents).
- Deploy **production-ready web app** for organizational use.

Business Owner Tasks:

- Coordinate **beta testing with pilot retirement homes and homecare partners**.
- Prepare **marketing materials, demo videos, and App Store listings**.
- Set up **customer support channels and onboarding resources**.
- Complete **legal, compliance, and data protection requirements** (privacy policy, HIPAA/PIPEDA compliance).

Outcome:
Stride becomes a **launch-ready platform** with both mobile and web applications fully operational for staff, residents, and managers.

Compensation: $2,000 2% equity

Phase 4 – Testing, Feedback, and Iteration (Expected work time: 1 week)

Deliverables:

- Collect structured **user feedback** from seniors, staff, and managers across beta sites.
- Implement **priority fixes and usability improvements** based on testing.
- Enhance **dashboard reporting features** (e.g., downloadable weekly reports, staff activity logs).
- Finalize **print functionality** for resident workout plans.

Outcome:
Stride is refined and stabilized for **scalable adoption** by retirement homes, homecare organizations, and individual users.

Compensation: $1750 1% equity

Development Break Clause

If the project experiences an agreed break in development (e.g., for strategic or funding reasons), both parties will define in writing:

- Duration of the break
- Whether any payments are paused or deferred
- Adjustments to timelines and milestone dates

Equity & Vesting

- 7% dilutable Equity granted upon Phase 4 completion (Testing & Iteration).
- 3% dilutable Equity vested over 18 months with a 8-month cliff:
    - No vesting until Developer stays active for 8 months post-Phase 4.
    - After 6 months, equity vests monthly over next 10 months.
    - Developer must maintain continuous active participation to keep vesting; this is only for maintenance work. Extra additions require new payment/equity.

Ongoing Role Expectations

- Developer commits to ongoing support, maintenance, and development after Phase 4.
- Minimum 8 hours/month on Stride-related work (bug fixes, features, advising, infra).
- Urgent issues responded to within 48 hours.
- If workload exceeds 30 hours/month, extra hours paid at $50/hr.
- Hours can be reduced below minimum only with written consent. Failure to meet minimum triggers forfeiture review.

Forfeiture Clause

- If Developer stops active participation (<4 hrs/month or no replies) for over 60 days without agreement, unvested equity is forfeited.
- Vested equity remains with Developer.
- Business Owner may hire others without further payment obligations.

Non-Compete Clause

The Developer agrees that, during the term of this Agreement and for a period of **24 months following termination** of this Agreement for any reason, the Developer shall not, directly or indirectly, whether as an individual, employee, consultant, contractor, advisor, partner, shareholder, or in any other capacity:

1. **Develop, market, or provide** any product or service substantially similar to, or competitive with, Stride's senior wellness platform, including but not limited to:
    - Digital platforms offering personalized exercise programs for older adults or caregivers.
    - Mobile or web applications focused on physical wellness, mobility, or cognitive engagement for older adults.
    - Wellness technology specifically designed for retirement homes, long-term care facilities, or homecare providers.
2. **Solicit or attempt to solicit** Stride's clients, partners, or pilot organizations (including retirement homes, homecare agencies, or independent older adult users) for competing products or services.
3. **Engage in any advisory or development work** for another company that directly competes with Stride's business model, unless written consent is obtained from the Founder.

This restriction shall not prevent the Developer from:

- Working on unrelated technology projects outside of the senior wellness sector.
- Holding less than 2% passive ownership in a publicly traded company.

If the Developer breaches this clause, any unvested equity is immediately forfeited, and Stride reserves the right to seek injunctive relief in addition to damages.

Intellectual Property

- All code, documentation, and work created for Stride belong to the Business Owner after payment/vesting.
- Developer retains rights only to general programming knowledge.

- This includes ongoing maintenance and updates after Phase 4.

Quality & Acceptance Clause

For each development phase, deliverables must meet the specifications and quality standards outlined in this Agreement. The Business Owner (Stride) shall review and test deliverables within **7 business days** of submission.

- If deliverables meet the agreed standards, the corresponding cash payment and/or equity shall be released.

- If deliverables do not meet standards, within reason (e.g., poor functionality, unusable content, failure to follow specifications), the Developer must correct issues within **10 business days** at no additional cost.

Failure to Deliver Clause

If Developer fails to meet any deliverables within 15 business days of the scheduled deadline without valid reasoning, cash payments may be paused and any unvested equity may be voided at Stride's sole discretion. Extensions can be discussed in writing with mutual agreement.

Optional Web App Development Clause

The parties agree that upon successful completion of Phase 4 of this Agreement, the Business Owner (Stride) shall have the **option** to engage the Developer for an additional Web Application development project.

- **Scope:** Full-featured Stride web application with functionality aligned to the iOS app, plus organization-level dashboards and reporting tools.

- **Compensation:** $2,000 cash + 3% additional dilutable equity, contingent on satisfactory delivery.

- **Timeline:** Estimated 6 weeks, schedule to be mutually agreed upon before commencement.

- **Trigger:** This option must be exercised in writing by the Business Owner within **18 months** of Phase 4 completion.

- **Equity Vesting:** Additional 3% dilutable equity shall follow the same vesting terms as outlined in this Agreement (e.g., 6 month cliff and monthly vesting).
